Summary

Highly motivated consultant with a proven record of success delivering modernization projects within fast-paced environments specializing in the Life Insurance and Financial Services sectors. I have a proven ability to lead cross-functional teams and ensure alignment with organizational goals, strategic initiatives, and project requirements and deliver effective results to stakeholders and senior leadership.

Experience

CapTech Consulting

Wayne, PA

Senior Consultant

July 2021 – Present

- Led efforts in modernizing authentication-based APIs in all areas: including development, requirements gathering, quarterly roadmaps using JIRA and Confluence, Java, Swagger, and Spring Boot
- Led Card Dispute/Fraud efforts utilizing Visio, Postman, Dynamics 365, MuleSoft and RESTful integrations with the external Visa Resolve Online in automating and increasing efficiency by a minimum of 20%
- Utilized Swagger and OpenAPI specifications on critical APIs to speed up new API integrations by 10%
- Facilitated deployment strategy for new modernized applications using BladeLogic and Ansible for Integrations
- Led Microsoft Power Platform projects utilizing services such as Power Virtual Agent, Power Automate, and Azure OpenAI toward the implementation of a conversational AI chatbot
- Facilitated and orchestrated engaging technical discussions with SMEs to foster innovation and cultivate meaningful relationships for future implementation initiatives
- Optimized onboarding processes for the Account Management Team by designing and implementing a SharePoint page, enhancing knowledge accessibility and collaboration across all account projects

Equisoft

Philadelphia, PA

Software Developer/Integration Consultant

August 2017 - July 2021

- Integrated the OIPA Application with new services using SAML, SSIS, Microsoft Azure, XSLT, REST, SOAP and Java technologies to enhance system interoperability and improve clients' performance by a minimum of 10%
- Led global teams with implementations in advising, modernizing infrastructure and integrating digitally with the data driven OIPA application in a SaaS environment with a 100% success rate
- Integrated with SSIS and Azure Data Factory to streamline report generation and data visualization for diverse claims and policy types, leveraging extensive SQL expertise
- Mentored and trained new team members, as well as various client teams to understand the OIPA application, configuration, and new integrations to reduce time for new business requirements gathering
- Contributed to company growth in the successful execution of RFP's and POC's for new integrations and architecture utilizing Oracle Insurance Policy Administration (OIPA) and other enterprise systems

Lockheed Martin

Moorestown, NJ

Associate Engineering Staff

June 2016 - August 2017

- Programmed in C++ for the LRDR radar system utilizing GIT and Crucible for collaboration and code reviews
- Created bash scripts to automate processes for running the LRDR product using Jenkins

Certifications

- AWS Cloud Practitioner Expires December 2026
- AWS Solutions Architect - Associate Expires March 2024

Leadership and Community Engagement

- Villanova MBA Ambassador Fall 2022 – May 2023
- Member, Young Professionals Council, Greater Philadelphia Chamber of Commerce Fall 2022 – Present
