

Ian Shinbrot
Philadelphia, PA
908.907.7862 – ianshinbro@gmail.com

Summary

Lead Software Engineer & Cloud Solutions Architect with 10+ years of experience modernizing enterprise systems across the Financial Services, Life Insurance and Public sectors. Expert in Java, Spring Boot, AWS, and Azure, leading cross-functional teams from technical strategy through full-lifecycle delivery.

Education

Villanova University

Master of Business Administration

Philadelphia, PA

May 2023

Drexel University

Bachelor of Science in Computer Science

Philadelphia, PA

June 2016

Experience

Whitespace/World Services

Remote

Technical Lead/Senior Software Engineer

February 2025 - Present

- Lead full-stack development and backend architecture for a modular, data-driven intake application utilizing Java, Spring Boot, React, TypeScript, Python, Terraform, Postgres, DynamoDB, and AWS (Lambda, SNS, SQS)
- Architect scalable REST APIs, middleware, and event-driven architectures using SNS/SQS to streamline asynchronous message processing across cloud services
- Defined and managed the technical implementation roadmap; translated long-term product vision into phased engineering milestones while managing architectural dependencies, mentoring junior engineers and accelerating team velocity
- Developed a Proof of Concept (POC) using Java and Spring Boot alongside React, leveraging AI-assisted engineering to accelerate front-end scaffolding and programmatically transform REST data for DynamoDB table schema implementation
- Acted as the point of contact for customer incident issues, guiding developers through root-cause analysis in complex codebases to efficiently deploy critical resolutions and maintain system stability
- Spearheaded the adoption of Cypress for cross-environment automated testing; defined quality benchmarks and governed implementation standards to ensure consistent system stability

CapTech Consulting

Wayne, PA

Senior Consultant

July 2021 – January 2025

- Led the Java/Spring Boot modernization of authentication-based APIs for a top 2 US Bank, managing the full SDLC while implementing OAuth and RESTful layers to ensure all code met federal security and strict programming standards
- Defined technical requirements and workflows for a Card Dispute/Fraud automation; translated complex business logic across Power Platform, Dynamics 365, and Visa Resolve Online to increase operational efficiency by 30%
- Spearheaded organization-wide learning and development pathways utilizing LinkedIn Learning, LMS 365, and various external resources to accelerate technical upskilling by over 30%
- Led Microsoft Power Platform initiatives, architecting and deploying complex internal workflow automations via Power Automate and delivering a proof-of-concept chatbot utilizing Power Virtual Agents

Equisoft

Philadelphia, PA

Integration Lead/Software Developer

August 2017 - July 2021

- Led the integration of OIPA (Oracle Insurance Policy Administration) for life insurance carriers, leveraging SAML, REST, SOAP, SSIS, Azure Functions (C#), and Java to bridge legacy core systems with modern digital services
- Managed a delivery team through the end-to-end implementation of OIPA core systems in hybrid on-prem and SaaS environments, achieving a 100% success rate for carrier migrations and system modernizations
- Architected an event-driven “Push Framework” to synchronize OIPA data with external digital platforms; served as Technical SME for complex client integrations and strategic feature roadmaps
- Contributed to company growth in the successful execution of RFPs and POCs for new integrations and architecture utilizing Oracle Insurance Policy Administration (OIPA) and other enterprise systems

Certifications

- | | |
|---|------------------------|
| • AWS Cloud Practitioner | Expires December 2026 |
| • Salesforce Certified MuleSoft Associate | Acquired December 2024 |
| • Salesforce Certified Platform Developer I | Expires December 2027 |
| • Power Automate Applied Skill | Acquired November 2024 |

Additional Information

Skills: Java, Spring Boot, SQL, Python, C#, Hibernate, Typescript, Microservices, AWS (Lambda, DynamoDB, SNS/SQS, S3), Docker, Kubernetes, Visio, React, Cypress, Power Platform, Junit, SAML, XML, Rest APIs, JIRA, Azure, APIM, Swagger, XSLT

Activities: Founder & Lead Organizer – Philly Schvitzers Running Club | Jewish Lay Leaders Award Recipient
